

SALCHAIN

FEEDER-BREAKER CHAIN (3"- 4") DOUBLE PITCH

The Salchain double pitch conveyor chain is primarily used for coal feeder-breaker machines. These chains are made from specially designed alloy steel and offer the best possible combination of high strength, wear resistance and a long, trouble-free service life - even under the most arduous operating conditions. Salchain's feeder-breaker chain frequently conveys over 2 million tons of coal over its life span.

Typical minimum breaking load for **standard** chains (single strand) = 52 Tonnes
Heavy duty chains available with increased breaking loads as per customer requirement.

Chain No.	PITCH		SIDEBAR			STD. PIN			EXT. PIN			BUSH		
	A	B	W	T	MATL.	G	F	MATL.	B	J	MATL.	D	E	MATL.
101501	76.2	101.6	60	14	CT	71.6	61.9	AL	24.7	150.5	AL	45	50.8	CC

Materials: **CT** = Carbon Steel Through Hardened **CC** = Carbon Steel Case Hardened **AL** = Alloy Steel Through Hardened + Induction Hardened
 Additional information available on request.

CONTINUOUS MINER CRAWLER CHAINS

Salchain crawler chains are developed to meet the high productivity requirements of underground coal mining. They have been designed using tough steel, metallurgically treated to obtain maximum wear durability to withstand the hardest operating conditions.

- Forged Crawler pads provide increased strength, toughness and wear resistance.
- Balanced grouser configurations lead to improved tramping forces, good performance, increased production.
- Locking pins are made from specially selected alloys, providing reduced wear.

Selection Chart

TYPICAL APPLICATION	PITCH (in / mm)	WIDTH (in / mm)	GROUSER PATTERN
12CM12, 12CM15 & 12CM30	7 / 178	22 / 560	Straight/Chevron
14CM15	7 / 178	20 / 508	Straight/Chevron

P – Pitch ; W – Width

*Chain assembly can be to customer specification.
